ARSNT

Army Serial Number Tracking

The screenshot shows the LOGSA webLIDB interface. At the top, it says 'webLIDB' and 'LOGSA SENSITIVE BUT UNCLASSIFIED'. There are buttons for 'CS 911', 'Help', and 'Logout'. The main content area is titled 'Serial Number Tracker Query Options' and contains a list of report options. A red arrow points from a callout box to the 'Query Options' link in the left-hand menu.

- AD HOC Reports**
 - Serial Number Ad Hoc Query

ARSNT is located in the Logistics Information Warehouse (LIW) WebLIDB Application. LOGSA offers ARSNT Training, Subject Matter Expert (SME) support and other related products.

- Consolidates serial number tracking within LOGSA from PBUSE, WebUIT, TEDB, RIDB, and LMP
- Reports and resolves differences between PBUSE and LOGSA (Reporting Conditions)
- Valuable tool for data cleansing
- ARSNT is a unique source of current and historical serial number data
- Provides customer capability to view all information related to selected serial number
- Future capability will include IUID data

Unclassified

KEY FEATURES

The Serial Number History report screen enables the user to query and return all available current and historical data for a serial number. All transactions for a serial number record from PBUSE will be displayed, and include FORM_NUM, TRANS_ACT_CD, DIC, TO_SERIAL_NUM, TO_REG_NUM, and the new TYPE_REQ_CD.
