The LBE Visibility Tool is in the Logistics Information Warehouse (LIW), located under the Reset Management Tool Tab. The LBE Visibility Tool...

- Provides Total Asset Visibility and Maintenance Status of Left Behind Equipment
- Provides Commanders, Managers, and Analysts the ability to identify LBE equipment that is truly "Available for Issue" by tracking equipment processing through the LBE Maintenance Cycle
- Future Capability will provide Integration with the LIW ARFORGEN Common Operational Picture (COP) Visibility Tool

Unclassified

# LBE Visibility

## KEY FEATURES

- Provides Multiple Filters to narrow search results
- Captures the Quantity of Equipment that was initially transferred to the L-UIC Property Book Account and Equipment on Rear Detachment UICs
- Tracks deadlined items, reports Full Mission Capable (FMC) Rates, and Equipment Available for Issue at 10/20 Standard
- Provides Drill Downs into the UIC & Serial Number Details, Work Order/Parts, and Labor Detail for all Left Behind Equipment
- Provides Metrics for capturing and reporting the Timeliness of Initial Technical Inspection & Maintenance Actions
- Provides Items that have Completed the Technical Inspection, Maintenance Processes, and reports them as Available for Issue
