## My RETROGRADE

Rapid Decision Support for Managing Your Class IX Retrograde Process!

The **MyRETROGRADE** Tool is one of the Logistics Information Warehouse (LIW) Tools in the suite of LOGSA Business Intelligence (BI) Dashboard Tools.

- Provide Warfighters, Tactical Commanders, Material Managers, Collection Points (DOL), Transportation Schedulers, LCMC Item Managers, HQDA Strategic Managers, and Soldiers at all levels with new retrograde management capabilities
- Improve the retrograde flow of items to Forward Repair Activities and/or Sources of Repair out of theater
- Identify volume and performance data for selected segments of the retrograde pipeline
- Identify locations and quantities of critical unserviceable Class IX in the field and en route to the national level
- Provide visibility of Field Warehouse/SSA and DoDAAC information, NSN Catalog attributes, and items on the critical retrograde list

 What documents are on the tactical unit's overage recoverable item list (ORIL)?  
 Review tactical units unserviceable aged documents for repairable items due back to the SSA. Unmatched issue documents are created when a unit owes the SSA an "unserviceable" item in return for the "serviceable" one issued. These docs are aged based on the days the return is outstanding and grouped into "age groups". The age groups are 1-14 days, 15-30 days, 31-60 days and > 60 days. The quantities are summarized. Drill down to document details.
