MyRESETPANS Introduction

MyRESETPANS is a BI executive-level analytical tool designed for management of the reset planning process. Providing visibility and actionable knowledge of Army BCTs and individual units in the reset planning process. MyRESETPANS allows strategic, operational, and tactical managers to quickly identify areas of concern and take corrective actions.

MyRESETPANS is a dashboard that:

- Identifies and tracks units and equipment entered into the Reset process.
- Provides user-friendly dashboard presentation and navigation, source data integrity, and drill-down capability.
- Identifies areas of reset planning concern for Warfighters, Strategic, Operational, and Tactical Managers, and LCMCs.
- Facilitates quick resolution of reset planning and equipment disposition concerns, and
- Displays tracked metrics for the redeploying units' Plan Build Timelines, Plan Execution Timelines, and Disposition Response Times from the respective LCMCs.
