TAMMS Equipment Data Base (TEDB)

The Army Maintenance Management System (TAMMS) Equipment Database (TEDB)

Ground Equipment by Serial Number & Authorized Registration Number

The screenshot shows the LIW interface with the following elements:

- Header: **LIW Logistics Information Warehouse**
- Location: Huntsville, AL
- Navigation: [Maintenance Message \(1\)](#) | [Home](#) | [Logout](#) | [Links](#) | [My Prof](#)
- Left Menu: [Queries and Reports](#) (with expand/collapse options), Asset Mgmt, Supply, Maintenance Mgmt, Army Equipment Loss Tracker, and **TAMMS Equipment DB** (highlighted with a red arrow).
- Right Panel: **Query and Reports :** TAMMS Equipment DB
 - [Ground Equipment Tracker](#)
 - [Equipment Control Record \(2408-9\)](#)
 - [Ground Equipment Verifier](#) (highlighted with a red arrow)
 - [Automated Reconciliation](#)

Access LIW
Click Maint.
Mgt.

Select TAMMS
Equip DB

Select TAMMS
Information

TEDB within the Logistics Information Warehouse (LIW) is located in the "Queries & Reports" Maintenance Mgmt TAMMS Equipment DB Menu. Other options, to include Usage Reports are under the Maintenance Tab "Fleet Serial Number Queries" located in LIDB.

- Provides maintenance significant ground equipment, fleet size and age data that can be used to justify replacing an aging fleet, maintenance limits, and diagnostics
- Used in allocation of OPTEMPO dollars, equipment location, usage tracking and performance data
- Contributes to improve budgetary, logistics acquisition and depot program management at all levels of the Army
- Repository for the assigned registration numbers cross-referenced to vehicle serial numbers
- Used for investigation of theft, accidents, and/or reporting traffic violations

Unclassified

- Provides Data Cleansing to verify, confirm, & validate the PBUSE, SAMS-E, and DPAS Serial Registration Numbers
- Usage information (collected monthly at serial/registration number level) is structured to meet needs of customers ranging from unit level to HQDA.
- Vehicle Age Information is used by managers programming for depot overhauls & equipment replacements
- Supports Units requirements to reconstruct lost or destroyed equipment logbooks & missing or illegible serial and registration numbers
- Maintains a record of modifications, overhaul, reset, and rebuild actions at the serial number level (and at registration number level where assigned) throughout the item's lifecycle
- Provides RESET Serial Registration Number Quality Control Validation for the LCMC TACOM RESET Office to prevent fraud and abuse, and ensure Equipment is properly identified prior to entering RESET
- Due to a large volume of errors and/discrepancies associated with the migration of data from SPB-R to PBUSE, LOGSA developed several automated tools to help property book/accountable officers with data integrity issues
