 - WACFC0 - 626TH CS BN CO G MEDICAL

The Task Force Builder Tool is found under the Operations and Plans menu item on the LIW page. The Task Force Builder will...

- Give Commanders, Managers, and Analysts the ability to build custom task forces, by individual UIC, using a drag and drop technique
- Provide the ability to save a Task Force and build branches/sequels from it to analyze various course of action
- Direct feed into the Preset Equipment Assessment Tool (PEAT)

Test drive the Task Force Builder Operational Capability today, and provide feedback to your LOGSA Channel representative.

Unclassified

KEY FEATURES

- Provides multiple filters to find UICs to add to your task force
- Pulls UICs from ASORTS or PBUSE UTO trees
- Ability to modify, delete and clone existing task forces
- Ability to view, download and officially publish a task force
- Future spirals will add the capability for Task Force Builder to be imported directly into ARMT and LBE Visibility

Task Force Builder solves the force alignment issues that have always plagued logistics planners. No longer must planners rely only on ASORTS or PBUSE UTO tree structures - now they can build their own UIC force structure for use in logistics planning applications within LIW. This provides Commanders, Managers, Analysts and users at all levels the ability to see the critical information they want to see, for the force they designate.
