REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can improve this manual. If you find mistakes or if you know of a way to improve these procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms) located at the back of this manual, directly to: Commander, U.S. Army Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NP, Redstone Arsenal, AL 35898-5000. A reply will be furnished to you. You may also provide DA Form 2028 information to AMCOM via e-mail, fax or the World Wide Web. Our fax number is: DSN 788-6546 or Commercial (256) 842-6546. Our e-mail address is 2028@redstone.army.mil. Instructions for sending an electronic 2028 may be found at the back of this manual immediately preceding the hard copy 2028. For the World Wide Web use: <https://amcom2028.redstone.army.mil>.

ENVIRONMENTAL/HAZARDOUS MATERIAL INFORMATION

This document has been reviewed for the presence of Class 1 Ozone Depleting Chemicals. As of change 05, dated 23 June 2000, all references to Class 1 Ozone Depleting Chemicals have been removed from this document by substitution with chemicals that do not cause atmospheric ozone depletion.

Distribution Statement A: Approved for public release; distribution is unlimited.

**SECTION I. AVIATION UNIT AND INTERMEDIATE MAINTENANCE REPAIR
PARTS AND
SPECIAL TOOLS LIST
(INCLUDING DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS)**

**SECTION I
INTRODUCTION**

1. SCOPE.

This RPSTL lists and authorizes spares and repair parts, special tools, special test, measurement and diagnostic equipment (TMDE) and other special support equipment required for performance of unit maintenance of the Engines, Turbine Aircraft T53-L-13B and T53-L-703. It authorizes the requisitioning, issue and disposition of spares, repair parts and special tools as indicated by the source, maintenance and recoverability (SMR) codes.

2. GENERAL.

In addition to Table of Contents (TOC) and Section I (Introduction), this repair parts and special tools list is divided into the following sections.

a. **Section II. Repair Parts List.** A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. This list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending numeric sequence, with the parts in each group listed in ascending figure and item number sequence. Items listed are indented when required to indicate the relationship to the next higher assembly. Repair parts for repairable special tools are also listed in SECTION II. Items listed are shown on the preceding associated illustration.

b. **Section III. Special Tools List.** A list of special tools, special TMDE and special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in the DESCRIPTION AND USABLE ON CODE (UOC) column). Items listed are shown on the preceding associated illustration.

c. **Section IV. Cross-Reference Indexes.** There are two Cross-Reference Indexes in this RPSTL: The National Stock Number Index and the Part Number Index. The National Stock Number Index refers you to the figure and item number. The Part Number Index refers you to the figure and item number.

3. EXPLANATION OF COLUMNS (SECTIONS II AND III).

a. **ITEM NO. (Column (1)).** Indicates the number used to identify items called out in the illustration.

b. SMR Code (Column (2)). The Source, Maintenance and Recoverability (SMR) code contains supply, requisitioning information, maintenance level authorization criteria and disposition instruction, as shown in the following breakout:

NOTE

Complete Repair: Maintenance capacity, capability and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) **Source Code.** The source code tells you how to get an item needed for maintenance, repair or overhaul of an end item/equipment. Explanations of source codes follows:

Source Code	Application/Explanation
PA	Stocked items; use the applicable NSN to requisition/request items with these source codes. They are authorized to the level indicated by the code entered in the 3rd position of the SMR code.
PB	
PC	
PD	
PE	
PF	
PG	
KD	Items with these codes are not to be requested/requisitioned individually.
KF	They are part of a kit which is authorized to the maintenance level indicated in the 3rd position of the SMR code. The complete kit must be requisitioned and applied.
KB	

MO -	(Made at Unit/AVUM Level)	}	Items with these codes are not to be requisitioned/requested individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION and USABLE ON CODE (UOC) column and listed in the bulk material group of the repair parts list of the RPSTL. If the item is authorized to you by the 3rd position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.
MF -	(Made at DS/AVIM Level)		
MH -	(Made at GS Level)		
ML -	(Made at Specialized Repair Activity (SRA))		
MD -	(Made at Depot)	}	
AO -	(Assembled by Unit/AVUM Level)		Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the 3rd position of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher level, order the item from the higher level of maintenance.
AF -	(Assembled by DS/AVIM Level)		
AH -	(Assembled by GS Level)		
AL -	(Assembled by SRA)	}	
AD -	(Assembled by Depot)		
XA -	Do not requisition "XA" coded items. Order the next higher assembly. (Refer to the NOTE below.)		
XB -	If an item is not available from salvage, order it using the CAGEC and part number.		
XC -	Installation drawing, diagrams, instruction sheet, field service drawing; identified manufacturer's part number.		

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes except for those sources coded "XA" or those aircraft support items restricted by requirements of AR 750-1.

XD - Items are not stocked. Order an "XD" - coded item, through normal supply channels using the CAGEC and part number given, if no NSN is available.

(2) Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to use and repair support items. The maintenance codes are entered in the third position of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace and use an item. The maintenance code entered in the third position will indicate authorization to the following levels of maintenance.

Maintenance Code	Application/Explanation
C -	Crew or operator maintenance done within unit/AVUM maintenance.
O -	Unit level/AVUM maintenance can remove, replace and use the item.
F -	Direct support/AVIM maintenance can remove, replace and use the item.
H -	General support maintenance can remove, replace and use the item.
L -	Specialized repair activity can remove, replace and use the item.
D -	Depot can remove, replace and use the item.

(b) The maintenance code entered in the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (perform all authorized repair functions).

NOTE

Some limited repair may be done on an item at a lower level of maintenance, if authorized by the maintenance allocation chart and SMR codes.

Maintenance Code	Application/Explanation
O -	Unit/AVUM is the lowest level that can do complete repair of the item.
F -	Direct support/AVIM is the lowest level that can do complete repair of the item.
H -	General Support is the lowest level that can do complete repair of the item.

- L - Specialized repair activity (designate the specialized repair activity) is the lowest level that can do complete repair of the item.
- D - Depot is the lowest level that can do complete repair of the item.
- Z - Nonrepairable. No repair is authorized.
- B - No repair is authorized. No parts or special tools are authorized for the maintenance of a "B" coded item. However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is shown in the fifth position of the SMR code as follows:

Recoverability Codes	Application/Explanation
Z -	Nonrepairable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the 3rd position of the SMR code.
O -	Reparable item. When uneconomically repairable, condemn and dispose of the item at unit level.
F -	Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support level.
H -	Reparable item. When uneconomically repairable, condemn and dispose of the item at the general support level.
D -	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below Depot level.
L -	Reparable item. Condemnation and disposal not authorized below specialized repair activity (SRA).
A -	Item requires special handling or condemnation procedures because of specific reasons (such as precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. **NSN (Column (3)).** The National Stock Number for the item is listed in this column.

d. CAGEC (Column (4)). The commercial and government entity code (CAGEC) is a 5-digit code which is used to identify the manufacturer, distributor or government agency/activity that supplies the item.

e. PART NUMBER (Column (5)). Indicates the primary number used by the manufacturer, (individual, company, firm, corporation or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an item, the item you receive may have a different part number from the number listed.

f. DESCRIPTION AND USABLE ON CODE (UOC) (Column (6)). This column includes the following information:

- (1) The Federal item name and, when required, a minimum description to identify the item.
- (2) Part numbers of bulk materials are referenced in this column in the line entry to be manufactured/fabricated.
- (3) Spare/repair parts that make up an assembled item may be referenced to an applicable figure within that line item (VALVE, CHECK, SEE FIG. 48 FOR BREAKDOWN), or indented and listed immediately following the assembled item as the next line entry.
- (4) The statement "END OF FIGURE" appears just below the last item description in Column (6) for a given figure in both Section II and Section III.

g. QTY (Column (7)). The QTY (quantity per figure) column indicates the quantity of the item used in the breakout shown on the illustration/figure, which is prepared for a functional group, subfunctional group or an assembly. A "V" appearing in this column instead of a quantity indicates that the quantity is variable and may vary from application to application.

4. EXPLANATION OF INDEX FORMAT AND COLUMNS (SECTION IV).

a. National Stock Number (NSN) Index.

(1) STOCK NUMBER Column. This column lists the NSN in National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN.

NSN <hr/> (e.g., 5385-01-574-1476)	When using this column to locate an item, ignore the first four digits of the NSN. Use the complete NSN (13 digits) when requisitioning items by stock number.
NIIN	

(2) FIG. Column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) ITEM Column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. Part Number Index. Part numbers in this index are listed by part number in ascending alphanumeric sequence (vertical arrangement of letters and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) PART NUMBER Column. Indicates the part number assigned to the item.

(2) FIG. Column. This column lists the number of the figure where the item is identified/located in Section II and Section III.

(3) ITEM Column. The item number is the number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

5. REFERENCE DESIGNATOR INDEX. (Not applicable)

6. SPECIAL INFORMATION.

a. Usable on Code. The usable on code appears in the lower left corner of the Description Column heading. Usable on codes are shown as "UOC:EZL, UOC:EZP or UOC:EZL, EZP" in the Description Column (justified left) on the first line applicable item//nomenclature. Uncoded items are applicable to all models. Identification of the usable on codes used in the RPSTL are:

<u>Code</u>	<u>Used On</u>
EZL	T53-L-13B
EZP	T53-L-703

b. Fabrication Instructions. When applicable, bulk materials required to manufacture items will be listed in the bulk material functional group of this RPSTL. Part numbers for bulk materials will also be referenced in the Description Column of the line entry for the item to be manufactured/fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in TM 55-2840-229-23.

c. Index Numbers. Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross-reference between the National Stock Number/Part Number Index and listed in a bulk material list in Section II.

d. Associated Publications. The publication(s) listed below pertain to Engine Models T53-L-13B and T53-L-703 its components.

TM 55-2840-229-23	Aviation Unit and Aviation Intermediate Maintenance Manual
-------------------	--

e. Illustrations – Listing. (Not applicable).

f. Oversize and Undersize Parts. When studs, bushings, etc., are listed, the degree of oversize or undersize is stated in the description. These parts will have a required quantity shown.

g. Directional References. Left and right directions are determined by standing at the rear of the aircraft or engine and looking forward.

h. Shipping and Storage Containers. This manual does not list spare and repair parts required for maintaining shipping and storage containers for T53-L-13B and T53-L-703 engines and modules. Refer to TB 55-8100-200-25, Maintenance of Specialized Reusable Containers for Aircraft Equipment, for requisitioning spare and repair parts.

7. HOW TO LOCATE REPAIR PARTS.

a. When National Stock Numbers or Part Numbers are Not Known.

(1) **First.** Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same group.

(2) **Second.** Find the figure covering the functional group or the subfunctional group to which the item belongs.

(3) **Third.** Identify the item on the illustration and note the item number.

b. When National Stock Number or Part Number is Known.

(1) **First.** If you have the National Stock Number, look in the STOCK NUMBER column of the National Stock Number Index. The NSN is arranged in National Item Identification Number (NIIN) sequence (see paragraph 4.a(1)). Note the figure and item number next to the NSN.

- (2) Second.** Turn to the figure and locate the item number. Verify that the item is the one you are looking for.

NOTE

If you have the part number, look in the PART NUMBER column of the Part Number Index. Identify the figure and item number, look up the item on the figure in Section II.

- 8. ABBREVIATIONS.** (Not applicable).

By Order of the Secretary of the Army:

DENNIS J. REIMER
General, United States Army
Chief of Staff

Official:

JOEL B. HUDSON
Administrative Assistant to the
Secretary of the Army
00731

DISTRIBUTION:

To be distributed in accordance with DA Form 12-31-E, block no. 3503, requirements for
TM 1-2840-260-23.

These are the instructions for sending an electronic 2028

The following format must be used if submitting an electronic 2028. The subject line must be exactly the same and all fields must be included; however, only the following fields are mandatory: 1, 3, 4, 5, 6, 7, 8, 9, 10, 13, 15, 16, 17, and 27.

From: "Whomever" whomever@avma27.army.mil
To: 2028@redstone.army.mil
Subject: DA Form 2028

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigram = .035 ounce
 1 decagram = 10 grams = .35 ounce
 1 hectogram = 10 decagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 10 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
inches	centimeters	2.540	ounce-inches	Newton-meters	.007062
feet	meters	.305	centimeters	inches	.394
yards	meters	.914	meters	feet	3.280
miles	kilometers	1.609	meters	yards	1.094
square inches	square centimeters	6.451	kilometers	miles	.621
square feet	square meters	.093	square centimeters	square inches	.155
square yards	square meters	.836	square meters	square feet	10.764
square miles	square kilometers	2.590	square meters	square yards	1.196
acres	square hectometers	.405	square kilometers	square miles	.386
cubic feet	cubic meters	.028	square hectometers	acres	2.471
cubic yards	cubic meters	.765	cubic meters	cubic feet	35.315
fluid ounces	milliliters	29,573	cubic meters	cubic yards	1.308
pints	liters	.473	milliliters	fluid ounces	.034
quarts	liters	.946	liters	pints	2.113
gallons	liters	3.785	liters	quarts	1.057
ounces	grams	28.349	liters	gallons	.264
pounds	kilograms	.454	grams	ounces	.035
