# LOGSA

## STORAGE SPACE MANAGEMENT

Established in 1948, the Packaging, Storage, and Containerization Center (PSCC), an activity of the U.S. Army Materiel Command Logistics Support Activity (LOGSA), has provided logistics support to the Warfighter for more than a half-century. LOGSA PSCC has a staff of globally recognized professionals that provide premier distribution and testing solutions.

### Services Provided

As the Army Storage Space Report Administrator, LOGSA PSCC provides expertise in the reporting and validation of available and occupied Army storage space worldwide. This data is a critical factor used in Base Realignment and Closure (BRAC) reviews and is used by Congress in determining requirements for new storage facility construction. We provide on-site support in preparing mandatory storage space reports, designing storage space planographs, and in providing guidance to your personnel in storage space reporting. We also support Army installations to ensure they are reimbursed for storing Strategic and Critical Materials.

### Storage Space Management Report (DD Form 805)

Army installations with 50,000 or more gross square feet of covered storage space must, by regulation, file a Storage Space Management Report. Accuracy of the report is essential since it is the only report within DOD and Army, which provides visibility of storage space utilization and is used to evaluate installations during BRAC reviews and by Congress to validate requests for construction of new storage facilities.

Our team of storage space experts is available for on-site visits to provide guidance to your personnel in completing the Storage Space Management Report or, if needed, to complete an accurate report for your activity. We can also utilize Computer Aided Design (CAD) technology to develop storage planographs depicting each of your storage areas, which will provide the data used to report storage space.

### Strategic and Critical Materials

LOGSA PSCC oversees the storage of DLA Strategic and Critical Materials, including ores and raw stocks, at Army installations. We centrally manage the billing process to DLA for the storage of this material at Army installations, and are available to assist these installations to ensure they are fully funded by DLA for storing these Strategic and Critical Materials.

We welcome the opportunity to discuss your storage space management requirements in detail. Please contact our experts at (570) 895-7774, DSN 795-7774, or email: [logsaltad@logsa.army.mil](mailto:logsaltad@logsa.army.mil).
