

Running vehicles indoors without ventilation is asking for trouble and courting death. But that's what happens in many motor pools during cold weather.

You can fix the problem by running exhaust fumes safely outside with flexible exhaust extensions.

Run exhaust outside

You need a snug fit of extension-to-exhaust pipe to prevent leaks, so eyeball this list of extensions that fit common tailpipe sizes:

NSN 4720-00-	Inside diameter
174-4668	1 inch
278-8030	1½ inches
278-8027	1¾ inches
278-8031	2 inches
174-6818	2½ inches
174-4664	3 inches
174-4671	4 inches

The unit of issue is feet, so order the length you need.
