

Supply . . .

Some supply folks say that since FED LOG (federal logistics) replaced ARMYLOG (Army logistics), the AMDF, SB 700-20 and other Army products have just plain disappeared.

Nope! The AMDF and SB 700-20 are alive and well in FED LOG. That's good because you need the AMDF to route requisitions and the SB 700-20 to do your property book work.

FED LOG contains supply information that's used by all the military services. It also has data that's unique to each military service. For the Army, this unique data includes the AMDF, SB 700-20 and products like the packaging and freight files.

"Hold on," you say. "When I boot up my FED LOG, there's no mention of Army anything. What gives?"

Well, when you boot up FED LOG you get the DOD file—the Federal Logistics Information System (FLIS) file. Data everyone uses is in this file.

To change to the Army file, simply click on the **green tank** on the shortcut toolbar. Now you have the AMDF, SB 700-20 and other Army products at your fingertips.

Want to define FED LOG information, a code or a given field? Just click on and hold the arrow/question mark button, drag it to the code/field you want defined and let it go. Bingo! There's your answer!

Click on the red apple and the FED LOG tutorial comes up. Now you can train yourself in FED LOG capabilities—at your convenience.

If this area doesn't say Army Interactive Query...

...click on the **green tank** to get the Army Interactive Inquiry Mode and the AMDF and SB 700-20

Click on the **red apple** to get the FED LOG tutorial
