

Challenge Bad AMDF Data

YOU UNIT **TAMMS/PLL** CLERKS ORDER PARTS ALL DAY LONG. BUT DATA CONFLICTS BETWEEN THE **FED LOG-AMDF** AND YOUR TECH MANUALS CAN MAKE THAT DAY VERY LONG.

FOR EXAMPLE, A TRUCK TM SHOWS A PART AS A CLASS **IX** REPAIR PART.

THE **AMDF** SHOULD SHOW AN ACCOUNTING REQUIREMENTS CODE (**ARC**) OF **X** (EXPENDABLE) AND A SUPPLY CATEGORY OF MATERIAL CODE (**SCMC**) OF **9K** (CLASS **IX** TACTICAL VEHICLE PART).

BUT THE **FED LOG-AMDF** ACTUALLY SHOWS THE PART WITH AN **ARC** OF **D** (DURABLE) AND AN **SCMC** OF **2E** (CLASS **II** GENERAL SUPPLY ITEM).

WELL, YOU CAN REPORT BAD **AMDF** CODES TO THE **USAMC** LOGISTICS SUPPORT ACTIVITY (**LOGSA**).

YOU KNOW THE **AMDF** DATA IS WRONG, BUT WHAT CAN YOU DO ABOUT IT?

LOGSA EVEN HELPS YOU EXPEDITE YOUR REPORT WITH THE DISCREPANCY REPORTING SYSTEM (**DIREP**).

DIREP TELLS YOU WHAT IT NEEDS FROM YOU TO CHALLENGE BAD CODES, KEEPS YOU INFORMED WITH MONTHLY REPORTS AND ONLY CLOSES THE CHALLENGE WHEN A FINAL SOLUTION IS SENT TO YOU.

DIREP LETS YOU CHALLENGE EVERY **FED LOG-AMDF** DATA ELEMENT EXCEPT FOR THE UNIT PRICE, LINE ITEM NUMBER (**LIN**) AND DEMILITARIZATION CODE (**DML**).

TO USE **DIREP**, JUST SEND **LOGSA** THE FOLLOWING INFO...

- Your name, mailing address and commercial/ DSN phone number.
- The NSN with questionable codes.
- ID the codes you think are wrong and show what they are in the current FED LOG-AMDF.
- Tell LOGSA what you think the codes should be and why.
