

Dull Finish *Can't* Be Improved

I'M GOING TO HAVE THE **BEST-LOOKING** BRADLEY ON THAT EXERCISE TOMORROW!

-GAH!- IT'LL SURE BE HARD TO MISS THAT TARGET!

When it comes to combat and tactical vehicles, a shine is **not** so fine! Some soldiers (and their commanders) think their vehicles should shine like their POV. So they use baby oil, brake fluid, diesel fuel or their own concoction to put a shine on their tank or truck. But vehicles that shine on the parade field stand out on the battlefield, too. They're easy to spot and destroy. A lot of effort and expense have gone into developing coatings and camouflage patterns to make your vehicle harder to spot. So don't blow it by adding "improvements" or "protection" to the paint. Military vehicles aren't supposed to shine like your POV!

SINCE I'M GONNA NEED TO "**DULL**" MY VEHICLE, WHAT DO I USE?

YOU'LL WANT TO WASH IT WITH AN AMMONIA AND WATER MIX.

SOAP AND WATER WILL WORK, TOO, BUT IT TAKES LONGER.
