

All Aircraft...

GOT AIRCRAFT CORROSION PROBLEMS?

If the answer is yes, your unit can get a no-cost visit from the AMCOM corrosion assistance team. The team will provide classes on corrosion prevention and control and hands-on training to all maintenance personnel. Overseas units will get a 2-week visit.

The AMCOM corrosion assistance team will send two representatives to your unit to teach the course.

The training consists of a 2½-hour classroom session followed by a 1-hour hands-on session with your aircraft. The classroom training covers the basics of corrosion, repair techniques, stopping

and preventing corrosion and types of materials to prevent corrosion. The team can assist with other corrosion problems you have, too.

To sign up for the course, contact the corrosion hotline at DSN 897-0209, (256) 313-0209 or toll free 1-866-222-2364. You can also contact team members by e-mail:
