

WOOD HANDLE PM

- ☆ If the handle is on a tool stored outside, paint it to protect against weather.
- ☆ Follow the local SOP for paint color, usually the same as the vehicle's basic color—but not in camouflage pattern.
- ☆ If the handle is on a tool kept inside, rub it with linseed oil. That'll prevent drying, cracking and splintering. Order a gallon of linseed oil with NSN 8010-00-152-3245.

When a painted handle shows exposed wood, strip and repaint it.

Paint handle...

When an unpainted handle starts to feel dry, give it another rub with linseed oil.

...or use linseed oil
