Doghouse Keeps You Covered

Do you have a doghouse cover over the PTO shaft in your AVL B? If not—and the shaft breaks loose—**you** could be in another kind of doghouse.

Sure, installing the doghouse cover is a hassle. Space is limited and you're probably thinking the cover doesn't do much good anyway. But you'll regret not installing the cover if the shaft ever breaks loose.

If that happens, pieces of the PTO shaft can go flying. The only thing protecting you is the doghouse cover. So replace a missing cover with NSN 5420-00-363-3931.

Once you have the cover in place, don't use it as a place to store duffel bags, ruck sacks or other items.

Straps can work down past the lip of the doghouse cover and wrap around the PTO shaft. If that doesn't break the shaft, the intense heat can catch the material on fire.
