

Check Total Price First

A NEW PLATFORM ASSEMBLY COSTS \$1,400!!! WE CAN GET A **WHOLE NEW MOUNT** FOR JUST \$200!!

HE'S RIGHT. **ALWAYS CHECK** TO SEE IF IT'S CHEAPER JUST TO BUY A WHOLE NEW MOUNT INSTEAD OF A PART.

Sometimes it's cheaper to replace your whole TV or VCR rather than just replace a defective part. That's sometimes the case with machine gun mounts, too.

For instance, the MK64 ammo box tray assembly, NSN 1010-01-151-6242, is a repair part for the ammo box mounting tray assembly, NSN 8140-01-156-7371. If you want just the box tray assembly, it costs more than \$900, while you can get the whole ammo box mounting tray for a bit more than \$200.

Or look at the M142 mount, NSN 1005-00-854-4463. Its platform assembly, NSN 1005-00-121-0779, costs more than \$1,400. But you can get the whole mount for around \$200.

The moral of the story is check the price of the entire assembly before you order a repair part for it. Sometimes you'll get a better deal just ordering a whole new mount.
