

JSLIST Questions Answered

MANY OF YOU IN THE ACTIVE ARMY HAVE ALREADY RECEIVED YOUR NEW JOINT SERVICE LIGHTWEIGHT INTEGRATED SUIT TECHNOLOGY (JSLIST) CHEMICAL PROTECTIVE SUITS...

...AND **ALREADY** QUESTIONS ARE POPPING UP.

HERE ARE THE ANSWERS TO SOME OF THE QUESTIONS AND WHERE TO GO IF YOU HAVE OTHER QUESTIONS...

MY JSLIST MOPP SUIT PACKAGING WAS NOT TIGHTLY VACUUM SEALED.

WILL THIS SUIT STILL PROTECT ME?

Yes. JSLIST overgarments come from the factory in vacuum-sealed nylon/foil bags that are sealed within clear plastic bags. Sometimes these nylon/foil bags lose their vacuum and appear puffy. Even though TM 10-8415-220-10 says otherwise, JSLIST in bags with broken vacuum seals are still good unless the bags have clearly visible holes or tears or have been opened. The TM is being changed to say this.

A puffy bag **doesn't** mean JSLIST is no good

I ACCIDENTALLY TORE A HOLE IN MY JSLIST BAG.

CAN I USE THIS SUIT?

No, as long as you immediately tape over the hole with duct tape to recreate the seal. If you accidentally open the bag, you can tape it shut. Just be careful not to tape over any part of the surveillance data on the bag. JSLIST in repaired bags retains its original shelf life.

If you immediately tape a hole, your JSLIST is still usable

"WILL A JSLIST EXPOSED TO OIL PROTECT ME?"

NO! IF YOU THINK YOUR JSLIST HAS BEEN EXPOSED TO PETROLEUM, OIL, OR OTHER LUBRICANTS, DON'T USE IT FOR ANYTHING OTHER THAN TRAINING.

The same goes for any JSLIST whose shelf life has expired. Stencil **TRAINING ONLY** in 2½-in letters or larger on the outside of the coat sleeve and trouser leg of those garments in a contrasting ink or paint.

Mark **TRAINING ONLY** on sleeve and leg

TRAINING ONLY

TRAINING ONLY

No. Some adhesive labels are falling off and unfortunately they contain important information. If your JSLIST bag is losing any of the seven labels but the labels are still inside the clear plastic outer bag, remove the clear bag and use an indelible marker to clearly print the surveillance info on the nylon/foil package. At a minimum, the info should include the last part of the contract number, last four digits of the NSN, manufacture date, date packaged, inspection date, surveillance marking number, and garment size. When you're finished, reseal the nylon/foil package in the clear bag. The bag helps protect JSLIST.

Mark info on nylon/foil package with indelible marker

If you have JSLIST with missing labels, however, you must turn it in. Contact the POCs listed below for information.

No, don't send JSLIST to DRMO for any reason. The shelf life of your JSLIST may have been extended. To check shelf life, see the Joint Service Set-Aside Program Website at <http://shelflife.pmnbc.com>. Most JSLIST are expected to be good for 15 years on the shelf. If your JSLIST's shelf life has expired or you unit doesn't need JSLIST, contact the POCs below for turn-in instructions.

If you have other questions, contact the JSLIST program manager, LTC David Anderson, at (703) 704-3834/DSN 654-3834, or e-mail pm-seq@peosoldier.nvl.army.mil

**Inspection date expired?
Your JSLIST may still be good**
