

HEY!
GREAT
SHADES!
WHERE'D
YOU GET
'EM?

BELIEVE
IT OR NOT,
THEY'RE
SAFETY
GLASSES!

Dear Editor,

Safety glasses are vital for mechanics and operators who need protection from small debris and sand when working at NTC or other desert environments.

Unfortunately, most safety glasses don't provide any sun protection and are so ugly that most guys *won't* wear them.

I found the perfect solution when I came across some safety glasses that were recently added to the supply system. These glasses filter out 99% of all harmful UV light, have curved lenses to provide 180° of protection, and have adjustable temple pieces with four different size settings.

An additional plus is the cool frame and lens style.

From the desk of the *Editor*

The better they look, the more likely they are to be worn. Thanks for the info!
