

A Mounting Repair

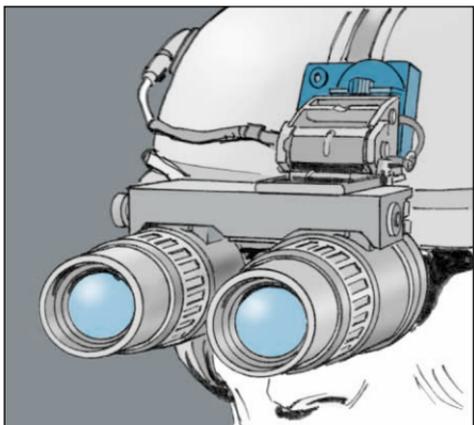

Dear MSG Half-Mast,

The universal mount, NSN 5855-01-457-2953, that holds the night vision goggles in place on the Kevlar helmet costs more than \$100.

If anything breaks on the mount, you have to order an entire mount. There are no repair parts.

The thing that breaks the most is the front bracket assembly. It sure would be nice to get just that assembly in the supply system at a lower price.

SGT T.O.

Dear Sergeant T.O.,

No sooner asked for than done. Order the front bracket assembly for the universal night vision device mount with NSN 5340-01-505-5835. It will run you about \$30.

Half-Mast
