

PM Talk

MAN, I JUST GAVE MY TRUCK A QUICK ONCE-OVER AND THAT WAS IT!

YEAH, ME, TOO. IT'LL DO.

THOSE WORDS SPEAK VOLUMES ABOUT *THEIR* PM. ARE YOU WALKING OR TALKING?

Everybody loves talking about the latest fad in clothing, shoes, and whatever makes people look good. But it takes more than talking to make you look sharp.

The same is true for PM. Talking PM is great, but talk is cheap without a little action. If you're gonna talk the PM talk, you've gotta walk the PM walk.

That means getting down and dirty—turning wrenches, performing PMCS, doing daily inspections, changing oil and filters or lubing when your TM calls for it.

So how do you spend your time? Do you talk about how good your equipment looks? Do you put off maintenance because you think there'll be time to do it tomorrow? Do you treat PM like a fad?

If so, start walking the PM walk now! Your life depends on what you have **done** to keep your equipment mission ready, not on what you've talked about doing.
