

Wheel Hub Seal NSN?

Dear Half-Mast,

We have trouble with the wheel hub seals on the MICLIC's trailer leaking. That lets water in the hubs and leads to corrosion and wheel problems. But we can't find an NSN for replacement seals. Please help.

SSG D.B.

Dear Sergeant D.B.,

The seal comes with NSN 5330-00-154-1226 and costs less than \$6. It's Item 4 on Page 9-1 in TM 9-2330-389-14&P, which is an advance copy dated Mar 93. If you're using the TM version on the ETM, it's item 4 in Fig 5-1.

Neither the ETM nor advance copy TM lists the correct quantity of use for the seal. You need eight seals to do all four wheels.

Half-Mast
