

DON'T FORGET THESE CHECKS

I KNOW YOU GUYS ARE IN A *RUSH* TO HIT THE ROAD,...

...BUT COULD YOU CHECK *THREE THINGS* FOR ME FIRST?

I SURE WOULD APPRECIATE IT... AND YOU WILL, TOO! THEY COULD SAVE *ALL* OF US FROM GETTING INJURED.

1

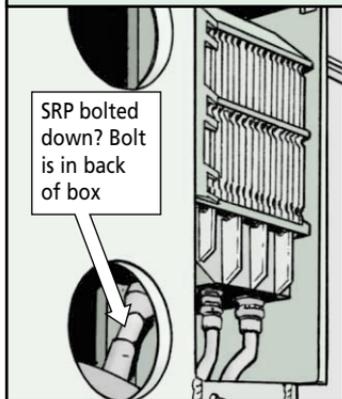

"MAKE SURE THE STABILIZATION REFERENCE PACKAGE IS BOLTED DOWN. THE BOLT IN BACK OF ITS BOX IS OFTEN FORGOTTEN. THEN IT BOUNCES UP AND DOWN DURING TRAVEL AND MESSSES UP THE GYROS."

2

"CHECK THE BOLTS FOR THE DRIVER'S SEAT. IF THEY'VE BEEN LEFT OFF, THE SEAT CAN PITCH FORWARD DURING TRAVEL AND THROW THE DRIVER INTO THE YOKE."

3

"OPEN THE VENT FOR THE CHEMICAL BIOLOGICAL RESERVOIR IF YOU PLAN TO USE IT. IF YOU RUN THE CBR WITH THE VENT CLOSED, THE CBR BURNS OUT."

SRP bolted down? Bolt is in back of box

CBR vent open?
