ID the HAZMAT

Hazardous materials (HAZMAT) need to be properly identified. It's the law. Problem is, HAZMAT labels, signs and placards no longer carry NSNs. That's why you need to get acquainted with a commercial manufacturer. One recommended manufacturer is Labelmaster. Their website is at: <http://www.labelmaster.com>

There you can find and order labels, signs and placards that meet regulations and safety requirements for domestic and international shipments.

After reaching the home page, click on **Government** in the top banner. The government page contains General Services Administration (GSA) contract information. To get GSA contract pricing online, you must first register for a GSA account.
