

ARE YOU A GUN CARD USER?

Neglecting this duty leads to expensive cannon tubes being replaced early. Even worse, some cannon tubes continue to be used when they should be condemned. Very unsafe!

Unfortunately, a lot of users aren't updating their cards on the Army Electronic Product Support (AEPS) website (<http://aeprs.ria.army.mil>). In fact, for M1-series tanks alone, more than 2,500 gun cards haven't been updated in the last 12 months!

DA Pam 750-8 (Feb 05), *The Army Maintenance Management System (TAMMS) Users Manual*, makes the unit commander responsible for designating someone to update the unit's gun cards.

All units should check their lists of authorized users at the AEPS electronic gun card website. Make sure all inactive or obsolete users are eliminated. Update all email addresses and make sure only AKO addresses are used. That will help reduce the amount of email traffic and the number of inactive gun card users.
