

# THE RIGHT WAY'S THE BEST WAY

I'M GONNA HAVE THE **CLEANESEST** TUBE IN OUR UNIT!

MAYBE I SHOULD GET A **PATENT** ON THIS BABY!

Y'KNOW, THE TM TELLS THE **ONE AND ONLY WAY** TO CLEAN CANNON TUBES.

AND I **DON'T REMEMBER** SEEING THAT THING IN THE TM!

**A** lot of tank crewmen have come up with “homemade tools” and “better ways” of cleaning the 120mm cannon tube. These are the same crewmen who have to explain why their cannon tubes have to be replaced before their time.

THERE'S ONLY ONE OFFICIALLY APPROVED METHOD OF CLEANING YOUR TANK'S CANNON TUBE.

IT WORKS AND IT'S SPELLED OUT **PLAIN AND SIMPLE** IN THE -10-2 TMS.

SO WHEN IT'S TIME TO CLEAN THE CANNON, PULL OUT SOME CLP, YOUR BORE BRUSH, NSN 1015-01-209-3483, CHAMBER BRUSH, NSN 1015-01-511-7872, AND CLEANING STAFF, NSN 1015-00-699-0633, AND **USE 'EM LIKE THE TM SAYS**
