# GET REFLECTIVE

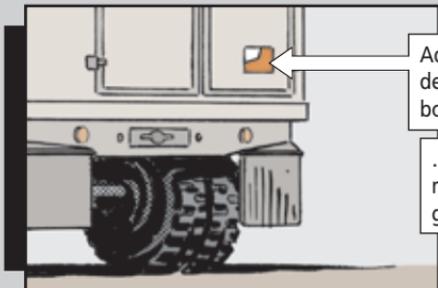

Too many drivers say they never saw the vehicle in front of them...until it was too late.

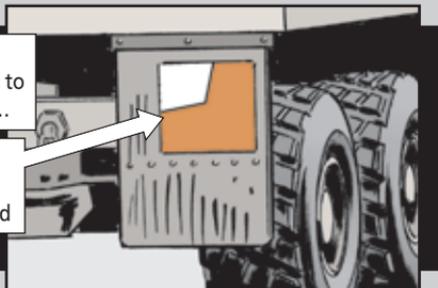

With a nod from your commander, you can add reflective decals (just like those you see on Army vehicles in Europe) to your over-the-road vehicles. These type of decals can help cut down the likelihood of rear-end collisions during a sand storm.

The decals are offered in two sizes: 7 7/8 x 7 7/8 inches and 15 3/4 x 15 3/4 inches. They are peel-and-mount decals, so surfaces must be clean before the decals are applied.

Order the smaller decal with NSN 9390-01-382-8308. Get the larger one with NSN 9390-01-382-8369.

Add decals to body...
