

DAGR Battery Pack is a Tight Fit

IT AIN'T COOL TO BE ON A MISSION AND HAVE YOUR DAGR AA BATTERY PACK POP LOOSE.

SO THAT YOU WON'T LOSE YOUR COOL *OR* YOUR BATTERIES, THE BATTERY PACK IS A **TIGHT FIT**.

THAT TIGHT FIT MAKES IT HARD TO OPEN WHEN IT'S TIME TO REPLACE THE BATTERIES.

SOME OF YOU ARE TAKING A SCREWDRIVER OR ANYTHING SHARP THAT'S HANDY TO PRY THE BATTERY PACK OFF.

YOU'LL **DAMAGE** THE DAGR CASE AND **WEAKEN** ITS WATER RESISTANCE.

INSTEAD OF **PRYING**, TRY **PULLING**.

HOLD THE DAGR UPSIDE DOWN WITH THE BATTERY PACK AT THE TOP AND FACING YOU.

GRAB THE PACK FIRMLY AT BOTH CORNERS.

PULL DOWN AND YOU SHOULD HEAR THE CORNER SNAPS RELEASE.

NOW GIVE THE PACK A GOOD TUG AND...

...IT SHOULD SLIP OUT INTO YOUR HAND.
