

# STAY OUT OF THE DOGHOUSE

PFFT... I'M NOT GONNA WORRY ABOUT REINSTALLING THE PTO SHAFT DOGHOUSE COVER.

UH-OH! YOU'RE GONNA GET US IN THE FIRST SERGEANT'S DOGHOUSE!

Crewmen, if you don't have the doghouse cover installed over the PTO shaft in your AVLB, you could be **in** the doghouse—and in danger.

Sure, installing the doghouse cover is a hassle. Space is limited and you're probably thinking the cover doesn't do much good anyway. But you'll regret not installing the cover if the shaft ever breaks loose.

If that happens, pieces of the PTO shaft can go flying. The only thing protecting you is the doghouse cover. So replace a missing cover with NSN 5420-00-363-3931.

Once you have the cover in place, don't use it as a place to store duffle bags, ruck sacks or other items.

Straps can work down past the lip of the doghouse cover and wrap around the PTO shaft. If that doesn't break the shaft, the intense heat can catch the material on fire.

Doghouse cover protects against loose PTO shaft

Straps can slip past lip of doghouse cover
