

Containerized Kitchen...

ARE YOU ON THE LEVEL?

WHEN YOU SET UP YOUR CONTAINERIZED KITCHEN (CK), THE FIRST THING YOU NEED TO LEVEL IS THE CONTAINER ITSELF.

AFTER THAT, YOU NEED TO LEVEL THE CK'S WINGS. IF YOU DON'T LEVEL THE WINGS, YOU'LL CREATE A FEW PROBLEMS...

FOOD MIGHT COOK UNEVENLY.

SOME OF THE CK'S APPLIANCES ARE ON WHEELS. THEY COULD START ROLLING AND INJURE THE COOKS.

So check the bubble level on each wing. If the bubble is in the center, you're on the level.

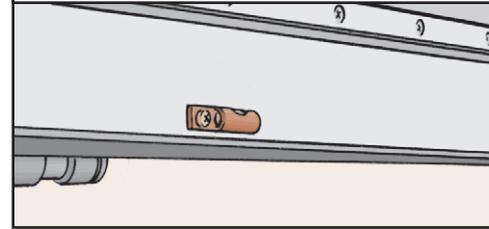

Leveling problems can start when you transport the CK: vibration loosens the screws and washers holding the levels, and one or both levels get out of alignment. In other words, one end tilts below the other. A misaligned bubble level can't give an accurate reading. Then you can't tell if the wing is truly horizontal.

YOU NEED TO REALIGN THE BUBBLE LEVEL. HERE'S HOW...

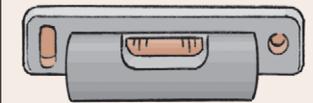

- Lower the wing until it's roughly parallel to the ground.

- Snug up the screw on the right side of the bubble level. Leave the screw on the left side loose to allow for adjustment.
- Using a tape measure or ruler, measure the distance from the bottom of the container wing to the bottom of the right side of the bubble level. The distance is about 1/8 inch.

- Measure the same distance from the bottom of the wing to the left side of the bubble level. Mark the length with a pencil.
- Adjust the left side of the bubble level so that both sides are the same distance away from the bottom of the wing.

- Tighten the screws on the left side and then the right side.

USE THE SAME PROCEDURE IF YOU REPLACE THE BUBBLE LEVEL.

HERE ARE THE NSNs FOR REPLACEMENT PARTS...

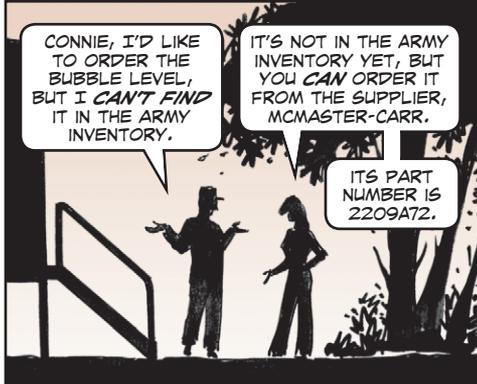

Screw, NSN 5305-00-054-6652
Washer, NSN 5310-00-929-6395

CONNIE, I'D LIKE TO ORDER THE BUBBLE LEVEL, BUT I CAN'T FIND IT IN THE ARMY INVENTORY.

IT'S NOT IN THE ARMY INVENTORY YET, BUT YOU CAN ORDER IT FROM THE SUPPLIER, MCMAS-TER-CARR.

IT'S PART NUMBER IS 2209A72.

AND HERE'S HOW TO REACH MCMAS-TER-CARR...

Phone: (732) 392-6200
Email: nj.sales@mcmaster.com
McMaster-Carr website: <http://www.mcmaster.com/>
