

CAPS KEEP GREASE CLEAN

HEY! I DON'T UNDERSTAND HOW THIS CAP IS GOING TO KEEP MY GREASE CLEAN!

I WAS TALKING ABOUT CAPS FOR YOUR GREASE FITTINGS!

Getting all the dirt, mud, and sand off your combat vehicle's grease fittings before lubing is important, crewmen. Using a dirty grease fitting forces dirt and sand in along with the grease. Contaminated lube not only won't do its job, but it can damage bearings and other components.

One way to ensure clean fittings is to keep 'em covered. Protective caps, NSN 4730-00-289-8148, do a great job of keeping grease fittings unclogged and dirt-free. So keep plenty on hand and use 'em when doing PMCS.

EVEN CAPPED FITTINGS SHOULD BE WIPED OFF BEFORE LUBING, THOUGH.

THAT PROVIDES EXTRA INSURANCE AGAINST CONTAMINATED GREASE.

DON'T I LOOK GOOD?!
