Washing Helicopter Turbine Engines

MECHANICS, YOU'RE AUTHORIZED TO USE THE TEWS, BUT *DON'T* SCRAP THE UNIVERSAL WASH UNIT! *YOU'LL NEED IT!*

USE THIS COMMERCIAL MANUAL WITH THE TEWS!

Check TEWS manual and engine manuals before washing

Mechanics, the aviation ground support equipment (AGSE) office at AMCOM has given a “thumbs up” on using the turbine engine wash system (TEWS), NSN 4940-01-514-0087, to wash helicopter engines.

The word is in aviation maintenance information message (MIM) GEN-MIM-06-004. It approves using the TEWS for washing and rinsing UH-60, AH-64, and OH-58 engines. The TEWS is added to the AVUM No. 2 shop tool set. It replaces the universal wash unit, NSN 4920-01-185-6215.

You can still use the universal wash unit for all T-700 engines, so don't get rid of it.

Before washing any engine, check out the engine cleaning procedures in the appropriate engine TM for each bird, and the commercial TM for the TEWS.

For the detailed scoop, check the MIM for info on authorized adapters that each helicopter engine uses.
