

# A WRENCHING REPAIR PROBLEM!

UNLESS I GET THE BRUSHES REPLACED...

...THIS WRENCH **WON'T** MAKE MUCH OF AN IMPACT!

Dear Half-Mast,

Our unit has several electric impact wrenches, NSN 5130-O1-309-6589, for the M2A2/M3A2 Bradley. Most of them can't be used, though, because the brushes are worn out.

These wrenches are supposed to be repairable, but I'm having trouble finding parts for them. Can you help?

SGT J.A.S.

Dear SGT J.A.S.,

Sure can. There's a brush repair kit for the electric impact wrench. Get it with NSN 5977-01-316-0888.

Here's what's in the kit:

Item	Qty
Brush, right hand (red)	1
Brush, left hand (black)	1
Brush spring	2
Brush holder assembly	2
Hex socket head screw (#6, 32 x 7/16")	2
Internal star washer (#6)	2
Hex wrench (7/16")	1
Instruction sheet	1

OOOOH! I REALLY NEED A BRUSH REPAIR KIT!
