Devices...

HELMET MOUNTS FOR ALL OCCASIONS

Dear Half-Mast,
Is the same mounting bracket for night vision devices used on the PASGT helmet and the advanced combat helmet (ACH)? What's used on the CVC helmet?

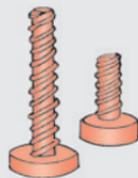

SSG D.R.R.

Dear Sergeant D. R. R.,

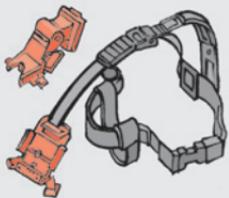

Here's what you need to mount the AN/PVS-7B, AN/PVS-7D and AN/PVS-14 night vision devices on the PASGT helmet, the ACH, and the CVC.

Start with the helmet mount assembly, NSN 5855-01-457-2953. If you're wearing a PASGT helmet, you have all you need! And, if you break the front bracket, you can order a new one with NSN 5340-01-505-5835.

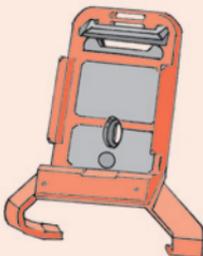

Use longer screw!

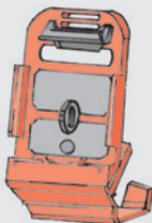

Helmet mount assembly.
Initial issue is PASGT
front bracket assembly
only

PASGT front
bracket assembly

ACH/CVC front
bracket assembly
kit includes a two-
piece screw and
post fastener

However, if you're wearing the ACH or a CVC, you'll also need a different front bracket. Order an ACH/CVC bracket with NSN 5340-01-509-1467. A two-piece, screw-and-post fastener comes with this assembly.

You can get the screw alone with NSN 5305-00-433-3741. Note that this screw is longer than the one that we recommended in PS 647 on Page 44, because that shorter screw did not fully engage through the post fastener.

You can also get the post alone with NSN 8470-01-144-5367.

Early next year, an ACH/CVC helmet mount assembly already equipped with the ACH/CVC front bracket will be available. The ACH/CVC helmet mount assembly can be ordered then with NSN 5855-01-551-4525.
