

SHOTGUN BREACHING CARTRIDGE AVAILABLE

THE ARMY NOW HAS A BETTER SHOTGUN CARTRIDGE FOR BREACHING DOORS!

A 12-gauge shotgun cartridge is now available that is designed specifically to breach padlock hasps and deadbolts, knobs and hinges on wooden doors.

The M1030 cartridge, NSN 1030-01-475-7440, can be used with both the Mossberg 500/590 and Remington 870 shotguns. Its DODIC is AA54. It has a brown tip and the cartridge is stamped "12GA, BREACHING, M1030".

The cartridge minimizes the ricochet hazards of breaching operations, but soldiers should still wear ESS land ops goggles when firing M1030s. NSN 4240-01-540-5576 brings green goggles and NSN 4240-01-540-5580 brings the desert tan version.

Small Arms...

EVEN EASIER LUBING

STENCIL BRUSH REPORTING FOR DUTY, SIR!

GOOD! WE'VE GOT A LOT OF LUBING AHEAD OF US!

Dear Editor,

We saw the suggestion in PS 652 (Mar 07) about using a sponge soaked with CLP and a brush for big lubing jobs in the arms room.

Something else that works well for big lubing jobs is a stencil brush. You fill it with CLP and then use the brush to apply the CLP. You can even control how much CLP is applied by how long you hold down the brush's button.

NSN 7520-00-248-9285 brings the brush for a bit more than \$30.

Editor's note: Excellent idea, Specialist. You can probably find a similar brush cheaper at your local hardware store.
