

AN AIMING LIGHT BAG?

THIS ISN'T
THE RIGHT
BAG!

SURE AS SHOOTIN',
IT WON'T PROTECT
MY AIMING LIGHT!

Dear MSG Half-Mast,

I ordered textile bag, NSN 8105-01-368-6253, Item 6 of Fig D5, in TM 11-5855-301-12&P on EMO163, for my aiming light. Unfortunately, a bag a lot different than the one I had came.

The bag I was trying to replace had three pockets and a velcro fastener. The bag that came has one pocket and a snap fastener. Has this bag replaced the old one? If so, it doesn't protect the aiming light nearly as well as the old bag.

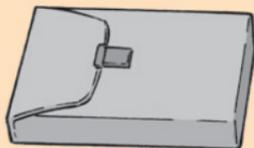

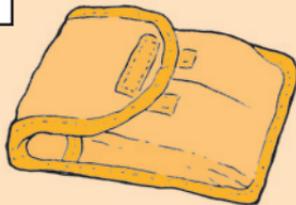

SSG J. L. P.

Dear Sergeant J. L. P.,

There has not been a change in the bag. You did not get the right one. Unfortunately, the wrong bag is now the bag in the supply system. Those in the know are on the problem. Sometime, hopefully sooner than later, the wrong bags will be removed from inventory and the right bags will be stocked. When we know for sure this has happened, we'll put the word out in PS. In the meantime, don't order new bags for the AN/PAQ-4B, -4C and the AN/PEQ-2A, -14, -15 and -16 unless your alternative is no bag at all.

Half-Mast
