Motor Pool Wheel Lift

Dear Half-Mast,

I'm looking for the NSN for the wheel lift that removes wheels from trucks or semitrailers. It has hydraulics, and I've seen it used on M939-series trucks before in the motor pool. Can you help me?

SSG M.U.V.

Dear SSG M.U.V.,

Look no more. You can get that wheel lift using NSN 4910-00-554-5983. That should spare you a sore back and wheel and axle damage, but get a buddy to help you with the lift.

And order parts through Scott Brusser at Capitol Logistics, LLC, by calling (301) 493-8674. Or e-mail: scott@caplogonline.com
