

M139 Mine
Dispenser...

Volcano + FMTV Dump Truck = OK!

WE'RE GONNA
BE A GREAT
MATCH FOR
ONE ANOTHER!

SOME VOLCANO
UNITS MAY NOT
HAVE RECEIVED
THE WORD THAT
IT'S OK TO MOUNT
THE VOLCANO ON
THE FMTV 5-TON
DUMP TRUCK.

Change 6 to TM 9-1095-208-10-1 authorized that. But to put the Volcano on the FMTV dump truck you need an adapter kit, which you can get free from the Armament Research, Development and Engineering Center (ARDEC) by emailing:

jim.krajewski@us.army.mil

Mounting the Volcano on the FMTV 5-ton cargo truck is **not** authorized, though.

Exercise

Remember that your Volcano needs exercise at least every 12 months. If it sits longer than that, the dispenser control unit and launcher rack electrolytic capacitors lose their charge and develop permanent shorts. The best way to track when your Volcano was last exercised is on a DA Form 2408-4, *Weapons Record Data* card. Put on the card Volcano firing dates and when direct support charged the capacitors. Then you can easily tell when the 12 month deadline is coming up.

Questions?

If you have any Volcano questions, contact ARDEC's Peter Giotis at DSN 880-5651/(973) 724-5651 or email: peter.giotis@us.army.mil
