

# Find Unit POCs in DODAACs

**W**hen it comes to communicating with units concerning acquisition and supply issues, the process has just improved.

Until January 2009, you could use a unit's DODAAC to find a unit's mailing or shipping address. But then you had to use snail mail to contact the unit. That changed when the Logistics Support Activity (LOGSA) enhanced the DODAAC search menu on its Logistics Information Warehouse (LIW) website. Now you'll be able to email the unit POC.

Users will use LIW to access the DODAAC search menu. They will need to complete a one-time security access request to register. Then they'll be able to login using their CAC cards.

<https://liw.logs.army.mil/>

From the LIW homepage expand the Force listing under Queries and Reports. Click on DODAAC Information and in the DODAAC Information menu box click on DODAAC Search.

Enter the DODAAC of the unit you need to contact and click on the Unit POC hyperlink displayed with the unit's DODAAC information. You'll get the unit POC's name, email address, and phone number.

The contact information will be updated automatically as units update their accounts.

If you have questions about this change to the DODAAC search screen you can email:

[logsa.ascp@conus.army.mil](mailto:logsa.ascp@conus.army.mil)

The screenshot shows a web browser window displaying the LIW DODAAC search results for DODAAC address W818P7. A black arrow labeled "CLICK HERE" points to the "Unit POC: STROH STEVEN" link. A second black arrow points from this link to a pop-up window titled "Unit Point Of Contact (POC) Information".
