

M109-Series SP Howitzers, M992A2 Ammo Carrier...

WHAT HAPPENED TO PHILLIPS?

HE DIDN'T USE FAN BLADE SCREENS WHEN HE WAS WORKING ON A PALADIN.

HEARD HE LOST A COUPLE FINGERS!

## FAN BLADES LOVE FINGERS

**G**et too close to the cooling fan blades on your howitzer or ammo carrier and they'll make finger food out of your hands. That's why fan blade screens should **always** be used during maintenance on a running engine.

The screens, NSN 2510-01-247-2976, keep fingers, hands and anything else from being pulled into the blades as you check for leaky hoses, pipes and fittings.

Each screen has hooks and a thumbscrew and locknut to secure it to the fan shroud. The screens should be used only during scheduled maintenance, though. Remove them before regular vehicle operation or the engine will overheat.

As a reminder to use the screens, put a warning decal, NSN 7690-01-244-9849, on both fan tower shrouds. You'll need general purpose cleaner, NSN 7930-00-515-2477, to clean the shrouds before applying the decals.

Screens keep fingers out of fans

Put warning decal on fan shroud
