

# BAGGIN' YOUR HELMET

Place the helmet in the bag with the front facing towards you. Any other position puts the helmet in harm's way.

Carelessly dropping the helmet bag or tossing it around in aircraft like a sack of potatoes can create helmet soft spots. That puts your noggin at risk of not having full protection.

And by the way, don't get the urge to toss other items in the bag like knee boards and checklists that can damage the helmet. Keep all that junk out of the bag and take care of your helmet like it says in TM 1-1680-377-13&P, EM 0250.
