

GUARD YOUR STEP!

*OUCH!
WATCH YOUR FEET!*

YOU JUST BROKE MY LED!

*OH, NO!
NOT ANOTHER ONE!*

If you've got big feet (or even little ones), you need to protect the light-emitting diode (LED) on your Bradley's vehicle distribution box.

The SLAVE RECEPTACLE POWER light gets snapped off if a driver or mechanic doesn't watch where he puts his feet when entering or leaving the driver's compartment.

Switch guard, NSN 5930-00-687-1079, will protect the LED. That's the guard that's already protecting the S2 toggle switch. Using it on the LED will keep the light burning bright when the slave receptacle is powered.

INSTALL THE GUARD LIKE THIS...

1. Remove the bezel from the LED socket.
2. Slip the guard over the LED.
3. Replace the bezel to hold the guard in place.
