

**YOU GOT
AVENGER
QUESTIONS?**

**WE GOT
ANSWERS!**

THREE GOOD QUESTIONS
ON THE AVENGER HAVE
COME TO PS RECENTLY.

WE THINK THEIR
ANSWERS
WILL HELP
AVENGER UNITS
THROUGHOUT
THE ARMY.

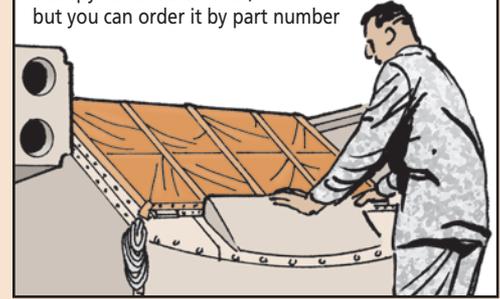

How do you get covers for the Avenger? There is no NSN for the canopy cover, but you can order one with PN 13265043, CAGE code 18876 and RIC of B64 on DD Form 1348-6. It's a good idea to use the canopy cover as much as possible when the Avenger just sits because blowing sand and rocks can really scratch up the canopy. Once you have trouble seeing through it, the whole canopy has to be replaced at a cost of several thousand dollars.

Some units give the canopy even more protection by cutting an old sleeping mat in half and putting the pieces under the canopy cover.

In rainy areas, it's best to cover the entire Avenger with a tarp. That helps prevent corrosion and electrical problems. A Bradley tarp works well. You can order a green tarp with NSN 2540-00-587-2532 or a tan one with NSN 2540-01-330-8062. Or you can save money just by having your fabric shop make a tarp 12 x 17 feet.

Canopy cover has no NSN,
but you can order it by part number

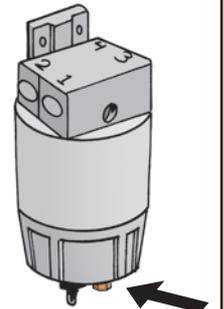

Bradley tarp covers whole Avenger

We have trouble finding parts for the environmental control unit (ECU). Are there NSNs for the fuel/water separator bowl and its gasket, the air filter, and the oil pan gasket? Yes! NSN 4330-01-438-7674 brings the separator bowl, gasket and air filter. You can help the gasket last by not muscling up on the bowl's bolt when you tighten it. That's what ruins gaskets. The oil pan gasket comes with NSN 5330-01-399-7319. See Fig 17M in TM 9-1440-433-24P for other ECU parts.

Easy does
it on ECU
fuel/water
separator
bowl bolt

Is there an NSN for the zipties for the cryogenics? Yes, NSN 5975-00-570-9598 will bring you 100 ties.
