

# The WHYS and HOWS for Disposing of Radios

Dear Editor,

Please spread the word that there are **NO** repair programs for these four radios any more:

Radio	NSN 5820-
AN/PRC-90	00-782-5308
AN/PRC-112	01-279-5450
AN/PRC-112C	01-458-6018
AN/PRC-112D	01-500-1535

No repair for PRC-90 or PRC-112!

Nor is there a repair program for the KY-913 Loader, NSN 7025-01-279-5308.

These radios and the loader should be turned in condition code "H" and DEMIL code "D" to a unit's DLA Disposition Services (the old DRMO).

If your unit turns in one of these radios, the project management office for the FBCB2 will issue the combat survival evader locator (CSEL), AN/PRQ-7, NSN 5820-01-499-4473, as a replacement, per the PM fielding schedule.

Time for the CSEL!

Larry Hall  
Inventory Manager
