

Some other things to remember while cleaning the barrel:

- Always run a cleaning patch moistened (not soaked) with CLP through the barrel before you pull the bore brush through. You don't want to pull a bore brush through a dry barrel. That can damage the barrel and the brush.
- Don't reverse direction while using the bore brush. That bends the bristles in the brush and soon you'll need a new brush. Always pull the brush straight from the chamber through the muzzle.
- Use a clean patch. If you reuse a patch, you're putting dirt back in the barrel that you just cleaned out.

Cleaning cable or cleaning rod should always go from chamber to muzzle in one straight motion

Always use a clean patch moistened with CLP

SITE OFFERS AMMO ENCYCLOPEDIA

AT LAST, AN
ENCYCLOPEDIA
ABOUT ME!

YES, THIS WILL
COME IN HANDY
FOR TRAINING.

**Ammo
Multimedia
Encyclopedia**

The Defense Ammunition Center, Serco Inc., and Oklahoma State University have created an online encyclopedia to answer your ammo questions.

Called the Ammunition Multimedia Encyclopedia (AME), the site provides information and training on new munitions. AME uses virtual reality technology to create a realistic, hands-on training environment for Soldiers and civilians who work with ammo.

Currently there are 180 munitions listed in AME, with another 100 to be added soon.

Access the site at either
<https://acc.dau.mil/ammo>
or
<https://mhp.redstone.army.mil>
