

NEW TUG IN TOWN

MOVING AIRCRAFT JUST GOT A WHOLE LOT **EASIER** WITH THIS NEW TUG!

GUESS I NEED TO RETIRE.

OUT TO PASTURE I GO!

FEELS LIKE I JUST RECEIVED A DEAR JOHN LETTER!

MECHANICS, MOVING AN AIRCRAFT FROM POINT A TO POINT B GETS A LITTLE **EASIER** NOW WITH A NEW PIECE OF GROUND SUPPORT EQUIPMENT ON THE SCENE.

YOU CAN SAY **GOODBYE** TO THE M-GATOR, THE OLD STANDARD TUG AND THE JOHN DEERE BECAUSE A **NEW TUG** IS ON THE BLOCK.

AS YOU USE THIS TUG, REMEMBER TO KEEP IT **PROBLEM-FREE** BY FOLLOWING THE PMCS TASKS IN WP 0017 00 OF TM 1-1740-221-13&P.

THE STANDARD AIRCRAFT TOWING SYSTEM (SATS), NSN 1740-01-557-5662, IS WHAT UNITS WILL NOW USE TO TOW GROUND SUPPORT EQUIPMENT AND AIRCRAFT.
