

NO OPEN DOOR POLICY

THE LAUNDRY
ADVANCED SYSTEM
(LADS) HAS THREE
ENCLOSURES...

- MAIN CONTROL
- INVERTER
- HEATING SYSTEM

KEEP THE DOORS TO
THESE ENCLOSURES SHUT
TIGHT. HERE'S WHY...

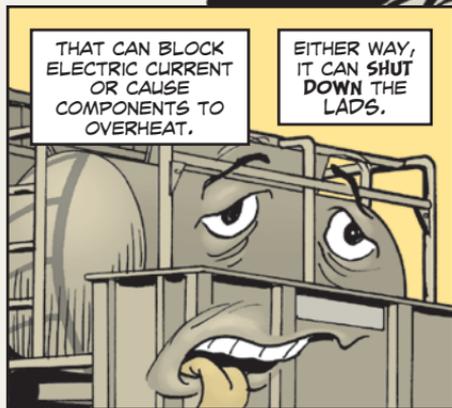

AN OPEN
DOOR IS AN
INVITATION
FOR FINE DIRT
AND SAND TO
SETTLE ON
ELECTRICAL
AND
ELECTRONIC
COMPONENTS
AND
CONTACTS.

THE DOOR'S OPEN!
THEY MUST WANT US
TO COME INSIDE!!

THAT CAN BLOCK
ELECTRIC CURRENT
OR CAUSE
COMPONENTS TO
OVERHEAT.

EITHER WAY,
IT CAN SHUT
DOWN THE
LADS.

THE PROBLEM IS
ESPECIALLY BAD
IN SOUTHWEST
ASIA, WHERE SAND
IS LIKE TALCUM
POWDER AND
COLLECTS IN VERY
TIGHT PLACES.

SO, KEEP THE
DOORS CLOSED.
AND IF YOU FIND
SAND INSIDE,
USE A VACUUM, BRUSH,
CLOTH OR CAN OF
COMPRESSED AIR
TO GET RID OF IT.
