

# BOTH SIGHTS NEEDED

Dear Specialist D.P.,

All of the M203 grenade launchers (M203, M203A1, and M203A2) should be equipped with both the leaf and quadrant sights. The leaf sight is generally what's used most during firing because it's the easiest to use. But it's only effective up to 250 meters. The quadrant sight, however, lets you fire out to 350 meters.
