

ONE-STOP SHOP FOR TACOM LCMC SAFETY AND MAINTENANCE MESSAGES

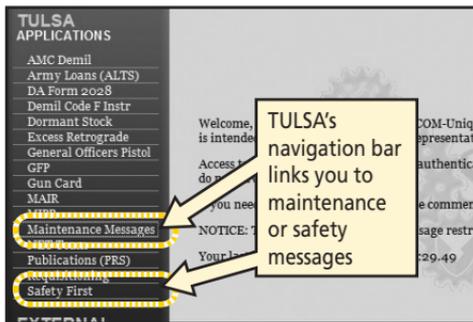

Are you hunting for past safety or maintenance messages for TACOM LCMC-managed equipment? All you have to do is pop on over to TULSA. And no, we don't mean the city in Oklahoma!

The historical collections for TACOM LCMC safety messages and maintenance messages are found online at the TACOM-Unique Logistics Support Applications (TULSA) website. You'll need your CAC and first-time users must request access. Go to: <https://tulsa.tacom.army.mil>

If you need assistance getting into the website, email TULSA's helpdesk at: tacom-lcmc.ilsc_tulsa@mail.mil

Once you're in, you can find maintenance messages by clicking Maintenance Messages in the left-hand column. You can find safety messages by clicking Safety First in the same column. You can even get future safety messages emailed to you. You'll find the E-Mail Subscriptions link in the navigation bar on both the maintenance and safety messages pages.

If you can't find a specific safety or maintenance message that you need, email a help request to: usarmy.detroit.tacom.mbx.ilsc-safety-of-use-mailbox@mail.mil
