

Stryker...

# Shut Down the Surge

THAT WAS A GOOD DAY'S WORK!

YEAH, BUT I CAN'T SHAKE THIS FEELING WE FORGOT TO DO SOMETHING...

YOU DID!

YOU FORGOT TO TURN OFF MY DVE!

DRIVERS, AT THE END OF THE DAY WHEN YOU'RE PARKING YOUR STRYKER IN THE MOTOR POOL, THERE'S ONE TASK YOU DON'T WANT TO FORGET.

Be sure to shut off power to the driver's vision enhancer (DVE) before you shut down the engine and power off the vehicle. You'll also want to double-check that the DVE is shut down before applying power to the vehicle and starting the engine.

If you forget, a power surge at startup could damage the DVE camera, NSN 5855-01-525-1631, or the DVE screen, NSN 5980-01-525-1688.

A new camera costs about \$10,300 and a new screen about \$3,500.

Turn off power to DVE to prevent power surge to camera
