

Small Arms...

# AN/PEQ-16B is the Way to Go

SORRY, GUYS! I'M REPLACING YOU BOTH ON THE M16, M4 AND M249 AUTOMATIC GUN.

NOT SO FAST!

YEAH! WE'LL STILL BE NEEDED FOR THE M240, M2, MK 19 AND M249 MACHINE GUNS.

WHEN IT'S TIME TO REPLACE YOUR M16/M4'S AN/PEQ-2A, AN/PEQ-15 OR -15A AIMING LASER, OR THE WEAPONS MOUNTED LIGHT (WML),...

...YOU HAVE A **NEW CHOICE.**

YOU CAN ORDER THE AN/PEQ-16B WITH NSN 5855-01-582-1584.

The AN/PEQ-16B combines an aiming laser with a WML. That means you won't need as many remote cables and batteries and you'll have a lighter load.

But remember that the AN/PEQ-16B can be used only on the M4/M4A1 carbine, M16-series rifle and the M249 when it's used as an automatic rifle. It can't be used on the M249, M240, M2 or MK 19 machine guns. For those, order the AN/PEQ-15 or -15A with NSN 5855-01-537-6000. That NSN will bring either the -15 or -15A.

If you have any questions about sights, contact TACOM's Dennis Timmons at DSN 786-1347, (586) 282-1347, or email: [dennis.c.timmons.civ@mail.mil](mailto:dennis.c.timmons.civ@mail.mil) or Anthony Smith at DSN 786-1350, (586) 282-1350, or email: [anthony.g.smith30.civ@mail.mil](mailto:anthony.g.smith30.civ@mail.mil)
